

Cross Band Repeater interface Unit RSM-111

This Cross Band Repeater interface Unit is a cost effective solution for cross band repeaters. The Cross Band Repeater Interface Unit uses a combination of VHF & LF mobile radios and can be used as VHF to LF cross band repeater.

Key Features:

- Provides Communication Between Two Different Frequency Band Radios.
- Ideal for maritime ship-to-shore communication and transoceanic air traffic control.
- Extremely compact and portable
- Can Run from a 12 volt supply
